

**NEW**

We are happy to introduce our new product Germicidal UV Lamps.

The advantages of our product are:

- Closed structure without UV light to people in the room, limiting the effect of UV rays only on the air passing through the device.
- It can work continuously as long as there are people in the room without harming their health - there is no direct exposure to people in the room.
- No air ozonation effect - which in turn allows the presence of humans and animals in the room while the lamp is operating.
- Low noise
- Mobile wheel structure that allows to cover different rooms without the need for installation and dismantling.
- Philips UV lamp, which guarantees real working hours as indicated and real indoor air disinfection.
- Indicators that the lamp is running and the fan is running.
- Hour Meter - This is a crucial factor because after hours of operation, the lamp continues to illuminate but is no longer effective. After the indicated hours, only the light source, in this case the Philips lamp, should be replaced.
- 9000 operating hours per lamp
- Powerful fan with precisely calculated volume of work.
- The presence of an air filter
- 2 year warranty
- Fast and reliable service.

Depending on the volume and size of the premises, we offer 2 varieties of Germicidal lamp:

	Model - SL 100	Model - SL 200
Power supply	~230 V $\pm$ 10%, 50/60 Hz	~230 V $\pm$ 10%, 50/60 Hz
Power Consumption Maximum	65 W	120 W
The volume of the room	55 м <sup>3</sup>	110 м <sup>3</sup>
Room size	23 м <sup>2</sup>	46 м <sup>2</sup>
Fan flow rate		
Maximum	300 м <sup>3</sup> /h	300 м <sup>3</sup> /h
Minimum	100 м <sup>3</sup> /h	100 м <sup>3</sup> /h
Working hours of the lamp	9000 h	9000 h
UV lamps - Philips	55W	2 x 55W
Dimensions (W/L/H)	450/480/1270 мм	450/480/1270 мм
Weight	8 kg	8 kg
